**FOR EVERY
JOB
A CLEVER
SOLUTION**

Quality is one of our strength.

We are glad about your inquiry.

History

The Production Association "Maschinentechnik Pretzschendorf" counted 30 people at the founding in 1960. At that time the company produced spare parts mainly. Over the years we specialized in the production of drive types such as keys and Woodruff-keys.

Today we also produce special drawing parts on our CNC machines.

Now

From our own production

Drawing parts

of different materials
with the surface according to
customer request

For more please visit our website:

www.maschinentechnik.de/sonderteile.htm

...and produce in modern buildings with newest CNC-technique.

Our machinery has CNC-vertical-milling-centres, conventional milling- and drilling-machines, flat- and roundtable-grinding machines, machines for the production of groove-pins, machines for production of tubular rivets and vibratory finisher for cleaning and polishing.

In our measuring room
We are able to:
- 2D, 3D roughness,
hardness, thickness
measurement
and more.

We manufacture our own
templates ...

Fasteners acc. DIN or drawing

Keys, Nose-wedges, Woodruff-keys, Sunk-keys

Keys acc. DIN 6885

Nose wedges acc. DIN 6887

Woodruff keys acc. DIN 6888

Keys acc. DIN 6886

Tangential-keys acc. DIN 268, 271

Spigot keys

Nuts

Nuts for T-slots acc. DIN 508

Rhombus nuts

Axle brackets acc. DIN 15058

Square weld nuts acc. DIN 928

Square nuts acc. DIN 562

Square discs acc. DIN 434, 435, 436

Tubular rivets

acc. DIN 7340

Tube cuttings

Groove pins

pins with round head acc. ISO 8746

pins with flat head acc. ISO 8747

Material - stock

In storage we have a big range of iron
and non-iron metals available.
Standard dimensions in flat and square
can be procured at short notice.

Following heat treatments and surfaces are possible (in wage work), for example:
zinc-, chrome-, phosphate-, nickel-coating, anodizing, sandblast, glass bead blast,
hardening, tempering, case hardening...
...and more.

Please to request.
